

Features

A pressure reducing valve is mainly used in a hose reel system to reduce the pressure at the inlet of the hose reel to the nominal working pressure.

Description

Model : LF-PRV-X (where X is the size and type)

Material : Brass

Working Pressure : Inlet Pressure upto 20 bar outlet pressure
between 1 to 5 bar

Available Sizes : ½" NPT | ¾" NPT | 1" BSP | 1" NPT | 1 ½" NPT |
2" BSP | 2" NPT
